HOOF FACTS

1. New hoof takes approximately 9-12 months to grow down from the coronary band.
2. It is therefore key that any hoof supplement is fed for a minimum of this duration to be effective.
3. When feeding a supplement, it is only NEW hoof growth which will benefit.
4. Hooves require movement which stimulates efficient blood flow for healthy hooves & growth.
Clean & supple tack is integral to your horse’s comfort & health. Lincoln Leather Care offers an extensive range of solutions to clean, protect & maintain your leather in optimum condition.

**Lincoln Biotin Premier**
